

# SAT<sub>Y</sub>SF<sub>I</sub>-CV

---

Masaki Waga

This is a class file to write Curriculum Vitae (CV) or Resume with SAT<sub>Y</sub>SF<sub>I</sub>. The layout is taken from Wilson Resume/CV, which is typeset by L<sup>A</sup>T<sub>E</sub>X. We also provide a class file dedicated to a publication list with the same style.

The basic usage of this package is quite similar to the other packages, e.g., stdja. See `examples/example.saty` and `examples/example_publication_list.saty` for complete examples.

## 1. New Feature in SAT<sub>Y</sub>SF<sub>I</sub>-CV 0.2.0

We support a new feature to typeset the publication list in thirdparty class files, e.g., stdja. See `examples/example_commands.saty` for an example.
