

SAT_YSF_I-CV

Masaki Waga

This is a class file to write Curriculum Vitae (CV) or Resume with SAT_YSF_I. The layout is taken from Wilson Resume/CV, which is typeset by L^AT_EX. We also provide a class file dedicated to a publication list with the same style.

The basic usage of this package is quite similar to the other packages, e.g., stdja. See `examples/example.saty` and `examples/example_publication_list.saty` for complete examples.
